Education

- Ph.D. Zoology 1995 University College London (University of London), UK
- B.S. (Hons.) Zoology 1991 University College London (University of London), UK

Research and Teaching Interests

Ecology; aquatic biology; ecosystem resource subsidies; Pacific salmon; environmental change; aquatic decomposers; ecological effects of introduced salmonids; contaminant biotransport; science pedagogy; applied intellectual virtue.

Professional Experience

- 2017 – present *Associate Teaching Professor*
Dept. of Biological Sciences, University of Notre Dame, Notre Dame, IN, USA
- 2013 – 2017 *Associate Research Professor*
Dept. of Biological Sciences, University of Notre Dame, Notre Dame, IN, USA
- 2005 – 2013 *Assistant Research Professor*
Dept. of Biological Sciences, University of Notre Dame, Notre Dame, IN, USA
- 2000 – 2004 *Post-Doctoral Research Associate*
Influence of marine nutrients from salmon on stream ecosystems. Dept. of Biological Sciences, University of Notre Dame, Notre Dame, IN, USA Advisor: G.A. Lamberti
- 1997 – 1999 *Post-Doctoral Research Associate*
Invertebrate colonization of Pacific salmon carcasses in southeastern Alaska streams. Dept. of Entomology, Michigan State University, East Lansing, MI, USA *and* Pacific Northwest Research Station (USDA Forest Service), Juneau, AK, USA Advisor: R.W. Merritt
- 1995 – 1996 *Post-Doctoral Research Associate*
Feeding by anopheline mosquito larvae. Dept. of Biology, University College London (University of London), London, UK Advisor: R.S. Wotton

Professional Service

- *Student presentations and posters judge*
Juneau High School Science Fair (1999), North American Benthological Society Annual Meeting (2000 – 2009), Society of Freshwater Science (2016), Northern Indiana Science Fair

(2000 - 2005), College of Science Undergraduate Research Symposium, University of Notre Dame (2007), International Association of Great Lakes Research Conference (2010).

- *Ad hoc reviewer*

Advanced Diagnostics and Therapeutics (Notre Dame), Alaska INBRE, Aquatic Biology, Aquatic Ecology, Arctic-Yukon-Kuskokwim Sustainable Salmon Initiative, American Midland Naturalist, American Naturalist, Aquatic Microbial Ecology, Canadian Journal of Fisheries and Aquatic Science, BMC Ecology, Canadian Journal of Water Quality, Conservation Biology, Ecology, Ecosphere, Ecosystems, Environmental Management, Environmental Pollution, Fisheries, Freshwater Biology, Functional Ecology, Fundamental and Applied Limnology, Hydrobiologia, Journal of Applied Ecology, Journal of Animal Ecology, Journal of Fish Biology, Journal of the North American Benthological Society/Freshwater Science, Limnology and Oceanography, Elsevier, Minnesota Sea Grant, National Park Service (US Department of Interior), National Science Foundation, North American Journal of Fisheries Management, Oxford University Press, Pacific Northwest Research Station - USDA Forest Service, Science of the Total Environment.

- *Mentor*

Supervision, guidance, letters of recommendation, and project development for >80 volunteers, technicians, and students (high school, undergraduate, graduate, and project staff)

Research Academic Credit: David Sena (Spring 2006-2008), AJ Reisinger (Spring 2007-2008), Szymon Ryzner (Spring 2009), Marth Dee (Spring 2011), Courtney Currier (Spring 2011-2013), Robert Ring (Spring 2011-Fall 2011), Pablo Quan (Fall 2011), Ian Trudell (Fall 2011-Fall 2012), Michael Moore (Fall 2012), Sarah Burbank (Fall 2012-Spring 2013), Andrew Wilson (Spring 2013-2014), Lillian McGill (Spring 2014-2016), Elyssa Schwendy (Spring 2014), David Weber (Spring-Fall 2014, Fall 2015, Spring 2016), Josephine Chau (Fall 2014-2015), Sean Cullen (Fall 2014-Spring 2017), Nathan Hermann (Fall 2016-Spring 2019), Mark Hancher (Spring-Fall 2018, Spring 2019), Samuel Mansfield (Fall 2020)

Sustainability Minor Capstone project: Kyle Walker (Summer, Fall 2020)

McDonald Summer Undergraduate Research Fellowship: AJ Reisinger (Summer 2007)

Teaching Apprenticeship, General Ecology Lecture: Timothy Hoellein and Denise Bruesewitz (Spring 2006), Sarah Roley (Fall 2011)

Advisor, *Scientia*, Journal of Undergraduate Research, College of Science (2008-2017)

ESTEEM thesis project: Fearghal Ryan (Fall 2009, Spring 2010)

Jordan Hall Science Team: Pablo Quan, Robert Ring, Ian Trudell (Summer 2011)

College of Science Summer Undergraduate Research Fellowship: Courtney Currier (2011),

Michael Moore (2012), Nick Weber (2014), Josephine Chau (2015), Nathan Hermann (2018)

Glynn Honors summer mentor: Ian Trudell (2012), Lillian McGill (2014), Sean Cullen (2015)

Introduction to Undergraduate Research: AJ Reisinger (Spring 2006), Young-Rae Kim (Spring 2008), Dan Williams and Pablo Quan (Spring 2011), Sarah Burbank (Spring 2012)

Biological Sciences Honors Program advisor: Courtney Currier (Fall 2012-Spring 2013; recipient of Outstanding Environmental Scientist Senior Award 2013), Nathan Hermann (Spring 2018-2019; recipient of Robert Braco, M.D. Honors Research Senior Award 2019)

Honors Seminar in Biological Sciences (Spring-Fall 2012-2014)

Honors Writing Mentor (Mary Schrek 2014, Zoe Volenec 2015, Amelia Grose 2020)

College of Science Communication Conference: Catherine Flatley (Spring 2012)

Post-doctoral (with Terrence Ehrman, Dept. of Theology): Bharat Ranganathan (Fall 2017)

Olympia Academy/AskND: Matthew Williams and Sean McMahan (Spring-Fall 2017)

Senior Leadership Committee, Dept. of Biological Sciences (Spring 2017-present)

- *Participant*
 - Early Action Open House, College of Science, Univ. of Notre Dame (Spring 2009-present)
 - Student-faculty dinners, First Year of Studies, University of Notre Dame (2014-2016)
 - Introductory Biology Digital Resources Development. Office of Digital Learning, University of Notre Dame (2016)
 - Environmental Change Initiative, Notre Dame Research, U. of Notre Dame (2015-present)
 - Student Leadership Committee Workshop Series (Statistics and Figure Making Workshop), Dept. of Biological Sciences, University of Notre Dame (Spring 2017)
 - Introductory Biology Sequence Revision-Molecules to Ecosystems Course, Department of Biological Sciences, University of Notre Dame (Fall 2017-present)
 - Academic Explorations, College of Science (Fall 2017-present)
 - Majors Night, First Year Studies (Fall 2017-present)
 - Junior Parents Weekend, College of Science (Spring 2018-present)
 - Sustainability Expo, University of Notre Dame (Spring 2018-present)
 - Introductory Biology Sequence Revision-Big Questions Course, Department of Biological Sciences, University of Notre Dame (Summer-Fall 2019)
 - Intellectual Virtues Institute (competitive application), Long Beach, CA (Summer 2019)
 - Member, St. Joseph County Advisory Council, Shirley Heinze Land Trust, Valparaiso, IN (2020 – present)
- *Committees*
 - Jordan Hall Display Cabinets, College of Science, University of Notre Dame (2006, 2019)
 - Undergraduate Research, Dept. of Biological Sciences, Univ. of Notre Dame (2007-present)
 - College of Science Joint Annual Meeting organizing committee (Chair), College of Science, University of Notre Dame (2007-2017)
 - Bernoulli Prize for Undergrad. Stat. Res., Dept. of Economics, U. of Notre Dame (2008, 2009)
 - Joint College of Arts and Letters, Science, and Engineering Da Vinci Undergraduate Research Program Review Panel, College of Science, University of Notre Dame (2010-2017)
 - College of Science Undergraduate Research Travel Grant/Summer Undergraduate Research Fellowship Review Panel, College of Science, University of Notre Dame (2007-2017)
 - The Notre Dame Hub Faculty advisory committee, Center for Undergraduate Scholarly Engagement, University of Notre Dame (2010-2012)
 - University Council for Academic Technologies Learning Environment subcommittee, University of Notre Dame (2010-2013)
 - University Landscaping Sustainability Committee, University of Notre Dame (2011-2012)
 - Graduate Committee: Janine Rüegg (2008-2010); Carmella Vizza (2014-2018); Brandon Gerig (2015-2017), Dept. of Biological Sciences, University of Notre Dame
 - University Committee on Research, Library and Special Professional Faculty Appeals, Office of the Provost, University of Notre Dame (2012-2016)
 - College Council, College of Science, University of Notre Dame (2013-2016)
 - Core Curriculum Committee, Office of the Provost, University of Notre Dame (2013-2016)
 - Faculty Senate, Univ. of Notre Dame, Research Faculty (2015-2017), Secretary (2016-2017)
 - Campus Life Council, Faculty Representative, University of Notre Dame (2016)
 - Fulbright Application Evaluation Committee, University of Notre Dame (2019)
 - Undergraduate Curriculum, Dept. of Biological Sciences, U. of Notre Dame (2019-present)
 - Core Curriculum Science & Technology Subcommittee, U. of Notre Dame (2020-present)
 - Health Advisory Subcommittee, Good Shepherd Montessori School (Fall 2020)

Teaching Experience

Instructor

Earth in Crisis - Current Environmental Issues (BIOS 10107; Spring and Fall 2003-2004, Spring 2013-2014) is a 3-credit non-science major's course that considers the most critical environmental issues in the context of important ecological ideas and concepts. The course intent is to inform non-science major students about environmental issues while increasing their awareness of ecological science through classroom teaching and guided discussion of scientific literature, often with undergraduate teaching assistants.

Molecules to Ecosystems (BIOS 10172; Spring 2019-present) is a 3-credit course for first year and sophomore science students that provides the second semester of the introductory biology sequence. This course addresses fundamental concepts needed to understand and analyze biological systems, enabling students to master the core concepts which underlie current biological understanding. The focus is on core concepts organized around essential themes in biology including the central importance of evolution; the flow of information; the relationships between structure and function; the transformation of energy and matter, and processes of homeostasis apparent in biological systems. Each of these is explored across all levels of biology, from small-scale molecular pathways to large-scale evolutionary processes.

Professional Development for the Environmental Sciences (BIOS 23101; Spring 2020-present) is a 1-credit course for sophomores and junior environmental sciences students that is meant to provide students with insights about the career opportunities that exist. Students explore relevant issues and access information that will help guide their career planning, including different sub-disciplines, practical aspects of career planning, be that through graduate or professional school, public service, or private industry, with faculty and alumni.

General Biology Laboratory (BIOS 21202; Spring 2018) is a 1-credit course for sophomore science majors that provides a foundational experience in practical biology. Topics include a semester long research project studying the effects of global environmental change on the marsh sedge, *Schoenoplectus americanus*, fetal pig dissection, and histology. Practically, students learn about experimental design, scientific writing, and data analysis and presentation.

Introduction to Undergraduate Research (BIOS 29498; Spring 2006, 2008, 2011, 2012) is a 1-credit course that provides undergraduate students with an introduction to scientific research to prepare them to engage in their own research with a faculty mentor.

General Ecology (BIOS 30312; Spring and Fall 2006, 2011) is a 3-credit course for science major's that examines the distribution and abundance of organisms in the natural world. Overall course objectives are to increase awareness about the natural world while contributing to a science education by integrating ecology with other disciplines. Specific course objectives are to enable students to understand key concepts in ecology while developing their critical thinking by discussing the primary literature. The course introduces core principles, classic studies, and current field and laboratory research in ecology.

Teaching Apprenticeship (BIOS 30671; Spring 2006, Fall 2011) is a 1-credit course that provides graduate students with experience of various aspects of undergraduate teaching.

General Ecology Laboratory (BIOS 31312; Fall 2006-present) is a 1-credit laboratory course. Students undertake a variety of field and laboratory exercises designed to illustrate classic studies in ecology while developing their critical thinking skills.

Biological Sciences Honors Program Seminar (BIOS 36495/46490; Spring and Fall 2012-2014, Fall 2018, Spring 2019) is a 1-credit course that creates a learning community where students interact with practicing scientists in order to develop their independence, skills, and understanding. Have participated as course instructor, guest speaker, and writing mentor for multiple participants in the program.

Teaching Practicum (BIOS 37495; Spring and Fall 2015-present) is a 1-credit course that provides undergraduate students with experience of various aspects of undergraduate teaching.

Biostatistics (BIOS 40411/42411; Spring 2008-2010, 2015) is a 4-credit course for science majors and graduate students that include all aspects of the use of statistical analysis in biology. Overall course objectives include increased understanding and application of statistics, especially in the context of biological research. Specific course objectives include the ability to design experiments and studies, analyze data appropriately, and report results effectively. The course includes both a lecture and a tutorial component using R.

Current Topics in Environmental Sciences (SC 40491; Fall 2018-present) is a 3-credit course for senior Environmental Sciences majors that provides a capstone experience. Current Topics addresses key environmental issues on Earth within the broader context of Global Environmental Change (GEC) and the Anthropocene. The course examines both the critical features and discuss possible solutions to GEC, using the primary literature along with expert testimony. The course prepares students, whatever their future profession or career intent, to help address the various issues associated with GEC, through Literature Review, Policy Brief, Opinion-Editorial, and Presentations assignments.

Summer Research Internship (SC 45999; Fall 2014) is 1-credit course for science majors that provides credit for summer internships.

Directed Readings (BIOS 46494, 46495, 46497; Spring 2009, 2017-2019) is a 1-credit course that provides students with the opportunity to discuss and practice relevant areas of scholarly endeavor in the context of relevant information. Subject areas have included introduction of non-native salmonids, intellectual virtue, environmental change, and writing opinion editorials about environmental issues.

Undergraduate Research (BIOS 48498; Spring 2006-2019) is a 1-2 credit (8 hours of research per credit hour) in which undergraduates engage in research during one or more semesters, depending upon their experience and interests.

Coordinator, Organizer, or Director

Human Genetics, Evolution, and Society (BIOS 10101; Spring and Fall 2004-2005), Coordinator for what was a 3-credit non-science major's course in which the principles of human genetics are taught using the cornerstones of modern biology, genetics and evolution. This course was partially funded by grants to Harvey Bender from the Lumina Foundation for Education, and is innovative in its use of undergraduate teaching assistants (UTA) to provide peer-directed learning. Responsibilities included management and mentorship of ten UTAs, implementation of educational technology, and classroom teaching when required.

Biostatistics (BIOS 42411/40411; Spring 2005), Coordinator for what is the tutorial component that covers the basic principles of statistics used in the life sciences. Responsibilities included management and mentorship of 12 graduate and undergraduate TAs for weekly tutorial classes,

together with classroom teaching as and when required. Tutorial exercises included data analysis using statistical software (SYSTAT).

Undergraduate Research, Coordinator, College of Science (2007-2017). The purpose of this position was to promote undergraduate research within the College of Science, through consultations with students and faculty; distribution of funds for travel and materials; organization of summer research fellowships; contact for off-campus opportunities (Cold Spring Harbor Laboratory, MD Anderson Cancer Center, Indiana Clinical Translational Sciences Institute); acquisition, analysis and presentation of data on participation; increased visibility of undergraduate research through publications, invited speakers, outreach events, and undergraduate symposia; and working with University Relations to generate new sources of funding support. As coordinator, participation in undergraduate research almost doubled.

Intellectual Virtue and Science Education Consultation, Co-Organizer, University of Notre Dame (May 2017). Purpose of the consultation was to consider ways in which intellectual virtue might be integrated into science education at colleges and universities. This involved bringing psychologists, philosophers, and science educators from outside and inside the University of Notre Dame to discuss several relevant issues. Co-organized with Dan Lapsley, Dept. of Psychology, and funded by Sir John Templeton Foundation, Institute for Scholarship in the Liberal Arts, Institute for Educational Initiatives, College of Science, and Dept. of Biological Sciences, University of Notre Dame.

Intellectual Virtue and Introductory Biology Consultation, Co-Organizer, University of Notre Dame (July 2017). Purpose was to consider ways in which intellectual virtue might be integrated into a future Introductory Biology sequence of courses. This involved Dept. of Biological Sciences faculty. Co-organized with Michelle Whaley, Dept. of Biological Sciences, and funded by Sir John Templeton Foundation and Dept. of Biological Sciences.

Environmental Sciences Major, Director of Undergraduate Studies, University of Notre Dame (2017-present). Purpose is to provide course and career advising to 70-80 students, as well strategic planning with respect to curriculum content and enrichment activities, and outreach to prospective and incoming students as well as alumni and external partners.

STEM Teaching Conference, Co-Organizer, University of Notre Dame (January 2018). The purpose of this college-wide conference, led by Richard Felder and Rebecca Brent, nationally recognized leaders in University STEM education, was to provide practical and proven strategies for improving both faculty effectiveness and student learning in STEM courses. Co-organized with Kristin Lewis and Michelle Whaley, Dept. of Biological Sciences, and supported by the College of Science, Kaneb Center for Teaching and Learning, and the Graduate School, University of Notre Dame.

Alan Guebert Public Talk: The only constant in farming (and your food) is change, Co-Organizer, Indiana University South Bend (October 2019). The purpose of this event was to provide the opportunity for nationally syndicated columnist to come to South Bend, and provide insights about food and farming to the local community, both through a public talk but also discussions with faculty and students. Co-organized with Ken Smith, Dept. of English, Indiana University South Bend, and supported by Dept. of Biological Sciences, Environmental Change Initiative, and Minor in Sustainability, University of Notre Dame, along with various sponsors at IUSB.

Guest Speaker, Instructor, or Assistant

Biological Sciences Laboratory (BIOS 10161); *Genetic Technology* (BIOS 10191); *Stream Ecology* (BIOS 60527); *Summer Program in Life Sciences* (Summer 2004, 2006, 2008-2010, 2013, 2014, 2016, 2018); *Biology Summer REU Program* (Summer 2016-2019); *Diversity, Culture, and Religion in Science* (SCI 53320; Spring 2013, 2014); *Current Topics in Environmental Science* (SCI 40491; 2013-2017); *Biological Sciences Honors Program Seminar* (BIOS 36495/46490; Spring-Fall 2014-present); *Biostatistics* (BIOS 40411; 2005, 2011, 2016); *Senior Leadership Committee Training Program* (Spring 2017); *Big Questions* (BIOS 10171; Fall 2018-2020); *Biological Investigations Laboratory* (BIOS 11173; Fall 2018)

Selected Presentations and Panel Participant (of >100 as author or coauthor)

- The virtues of art for science. Inspire Session. **Invited.** 1st virtual meeting of the Ecological Society of America, Online (August 2020)
- Juday Creek: another reason Fr. Sorin chose a perfect spot for Notre Dame. **Invited.** Izaak Walton League of America, South Bend, IN, USA (September 2019).
- The influence of Pacific salmon spawners on stream ecosystems: Why context matters. **Invited.** Juneau Forestry Sci. Laboratory (USDA Forest Service), Juneau, AK, USA (April 2017).
- Introduction of Salmon to the Great Lakes: What's the (Ethical) Problem? Research Integrity Workshop. **Invited.** University of Notre Dame, Notre Dame, IN, USA (March 2017).
- Panelist. Sustainable Wisdom Conference. **Invited.** University of Notre Dame, Notre Dame, IN, USA (September 2016).
- Influence of Pacific salmon spawners on stream ecosystems: why context matters. **Invited.** 64th meeting of the Society of Freshwater Science, Sacramento, CA, USA (May 2016).
- Panelist. Breakthrough Discussion of 'Living Downstream'. **Invited.** DeBartolo Performing Arts Center, University of Notre Dame, Notre Dame, IN, USA (October 2013).
- Understanding transfer of pollutants from Pacific salmon spawners to resident fish in Michigan streams. **Invited.** Annual Meeting of the Aquatic Research Laboratory and Michigan Dept. of Natural Resources, Lake Superior State University, Sault Ste. Marie, MI, USA (May 2013).
- Contaminant Transport to Great Lakes Tributaries by Pacific salmon. **Invited.** Great Lakes Fish Health Committee Meeting, Great Lakes Fishery Comm., South Bend, IN, USA (Feb. 2013).
- Non-native Species and Ecosystem Restoration in the Great Lakes. **Invited.** Fish Passage Symp., MI Union of Cons. Clubs and Trout Unlimited, Traverse City, MI, USA (Aug. 2012).
- The bad along with the good: contaminant transport to stream ecosystems by Pacific salmon. 60th meeting of the Society of Freshwater Science (formerly known as NABS), Louisville, KY, USA (May 2012).
- Stable isotopes reveal the influence of land use on aquatic food webs in agricultural watersheds of the Mississippi alluvial plain. 59th meeting of North American Benthological Society, Providence, RI, USA (May 2011).
- Ecological effects of Pacific salmon spawners on Great Lakes stream ecosystems. 53rd International Conference of International Association of Great Lakes Research, Toronto, Ontario, Canada (May 2010).
- Temporal patterns of isotopic enrichment in a Southeast Alaska stream foodweb: The role of salmon spawners and environmental context. 57th meeting of North American Benthological Society, Grand Rapids, MI, USA (May 2009).
- Environmental change alters the ecological role of Pacific salmon in Southeast Alaska rivers. 93rd Meeting of Ecological Society of America, Milwaukee, WI, USA (August 2008).
- Ecological influence of Pacific salmon in managed forested watersheds. 55th meeting of North American Benthological Society, Columbia, SC, USA (June 2007).

- Variation in the effects of salmon-derived nutrients on stream ecosystems in southeastern Alaska. 54th meeting of North American Benthological Society, Anchorage, AK, USA (June 2006).
- Long-term studies of the effects of salmon spawners on stream ecosystems. 53rd meeting of North American Benthological Society, New Orleans, LA, USA (May 2005).
- Do salmon carcasses and pellets of processed salmon carcasses have the same effects on streams? 51st meeting of North American Benthological Society, Athens, GA, USA (May 2003).
- Spawning Pacific salmon: what are they good for? **Invited.** Dept of Biology, Eastern Michigan University, Ypsilanti, MI, USA (February 2003).
- Do spawning Pacific salmon increase the productivity of freshwater ecosystems? 50th meeting of North American Benthological Society, Pittsburgh, PA, USA (May 2002).
- Ecological consequences of salmon enrichment for streams: where do marine-derived nutrients go? 49th meeting of North American Benthological Society, La Crosse, WI, USA (June 2001).
- Influence of enrichment by Pacific salmon on macroinvertebrate growth and standing stock in southeast Alaska streams. International Salmon Nutrient Conference: Restoring Nutrients to Salmonid Ecosystems, Eugene, OR, USA (March 2001).
- Carcass-invertebrate interactions: implications for the influence of Pacific salmon on ecosystem productivity. **Invited.** 48th meeting of North American Benthological Society, Keystone, CO, USA (May 2000).
- Colonization and processing of salmon carcasses by macroinvertebrates in Southeast Alaskan streams. 47th meeting of North American Benthological Society, Duluth, MN, USA (May 1999).
- Aquatic and terrestrial invertebrates colonizing salmon carcasses in southeast Alaska. **Invited.** AFS Western Division meeting, Anchorage, AK, USA (October 1998).
- Invertebrate fauna of salmon carcasses. **Invited.** University of Alaska Southeast, Juneau, AK, USA (June 1998).
- Invertebrates colonizing anadromous salmonid carcasses in southeastern Alaskan freshwater systems. AFS Alaska Chapter meeting, Juneau, AK, USA (November 1997).
- The biology of chironomid midges in slow sand filter beds. **Invited.** Dept. of Biology, Birbeck College, University of London, UK (June 1996).
- Particles and the coexistence of three species of midge (Diptera: Chironomidae). 43rd meeting of North American Benthological Society, Keystone, CO, USA (June 1995).
- Role of particles in the development of midges (Diptera: Chironomidae). 42nd meeting of the North American Benthological Society, Orlando, FL, USA (June 1994).
